

## PRESS RELEASE

Prague, 23<sup>rd</sup> October 2018

### 1C ENTERTAINMENT AND 3D REALMS BRING ION MAIDEN TO CONSOLES Q2 2019

*Joining Forces for Both Ion Maiden and an Unannounced FPS Based on the Original Quake Engine*

[1C Entertainment](#), an international group operating in the segments of game production, distribution and services for video game developers will collaborate with [3D Realms](#), the developer of classic first-person shooters including *Duke Nukem* and *Shadow Warrior*, to bring *Ion Maiden* to Nintendo Switch, PlayStation 4 and Xbox One in Q2 2019, in addition to the previously announced Steam release. Both companies will also collaborate on a new unannounced FPS based on the original *Quake* engine coming to all the same platforms as *Ion Maiden*.

Distribution of both games in Poland, the Czech Republic, Slovakia and Hungary will be carried out by Cenega S.A.

*Ion Maiden's* exclusive multi-hour preview campaign is available on [Steam Early Access](#) for \$19.99 in English, French, Italian, German, Spanish and Russian. The retro first-person shooter developed in the Build engine, which powered *Duke Nukem 3D*, *Blood*, and *Shadow Warrior*, will simultaneously release on all platforms Q2 2019 in both digital and physical formats. In this prequel to 2016's *Bombshell*, Shelly has to take down transhumanist mastermind Dr. Jadus Heskell.

While *Ion Maiden* utilizes a classic engine, Early Access players have still found the modern staples they've come to expect, including headshots, more physics and interactivity, widescreen support, controller support and auto-saves. 3D Realms and 1C Entertainment are taking the best of both worlds.

1C Entertainment is responsible for the popular RTS series *Men of War*, the fantasy tactical role-playing games *King's Bounty*, and World War II flight simulator series *IL-2 Sturmovik*. Collaborating with 3D Realms promises to bring both teams' creative powers together and deliver the high-quality content gamers know both companies for.

"Presenting games like *Ion Maiden* to all of 3D Realms' fans is our number one priority," said Mike Nielsen, CEO of 3D Realms. "Partnering with 1C Entertainment means we can make our dedicated community happier by bringing Shelly to consoles."

"I was always a fan of the old-school classic FPS titles *Duke Nukem 3D*, *Blood*, *Max Payne* and *Shadow Warrior*, so I am super thrilled to partner with a legendary studio such as 3D Realms," said Nikolay Baryshnikov, CEO of 1C Entertainment. "As a global publisher, our goal is to bring top-quality titles to all the gamers around the world, and our cooperation with 3D Realms is a great addition to our portfolio. For me personally, it's a kid's dream come true."
